Online Beauty Parlour Appointment Booking System

Aim

To design and develop a responsive appointment booking website that lets customers view services and stylists, book, reschedule and cancel appointments with online payment, and lets the salon manager manage reservations and feedback.

Algorithm

1. Start the application; the customer registers and logs in.
2. Customer browses the services and stylist profiles and selects a service, a stylist and a date.
3. The system shows the reservation calendar with unavailable hours locked out; the customer picks a free time slot.
4. Customer pays the full amount or a deposit through Stripe or PayPal; unpaid reservations are cancelled automatically.
5. The system sends a confirmation email and reminder; the customer views upcoming and past reservations, and can reschedule or cancel.
6. Customer leaves feedback after the visit.
7. Salon manager or staff logs in, views the calendar and upcoming reservations, and adds, edits or cancels reservations.
8. Manager sends an SMS or calls the customer, reads the feedback and logs out.

        ].map(csvCell).join(",");
    });

    const csv = [headers.map(csvCell).join(","), ...rows].join("\r\n");
    const blob = new Blob(["\uFEFF" + csv], {
        type: "text/csv;charset=utf-8;"
    });

    const url = URL.createObjectURL(blob);
    const link = document.createElement("a");

    link.href = url;
    link.download = "BeautyParlour_Appointment_Report.csv";
    link.click();

    URL.revokeObjectURL(url);
});

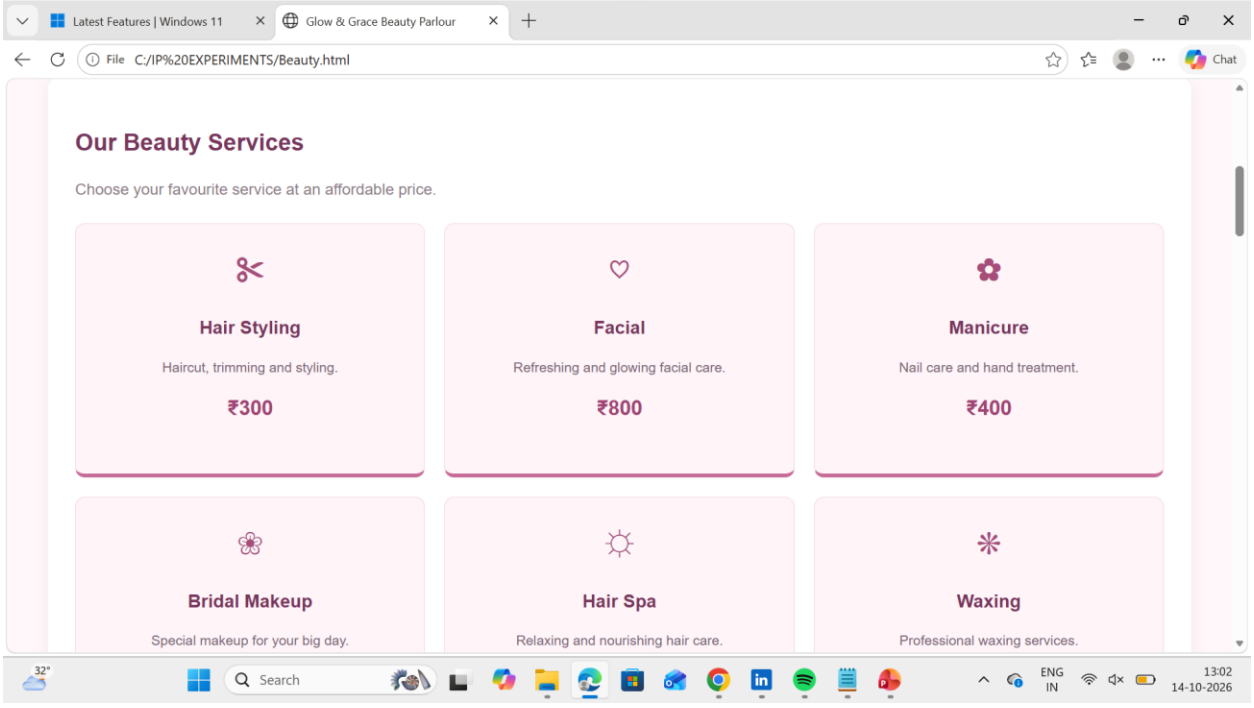

// INITIAL DISPLAY
renderServices();
renderStylists();
renderAppointments();
renderFeedback();
```

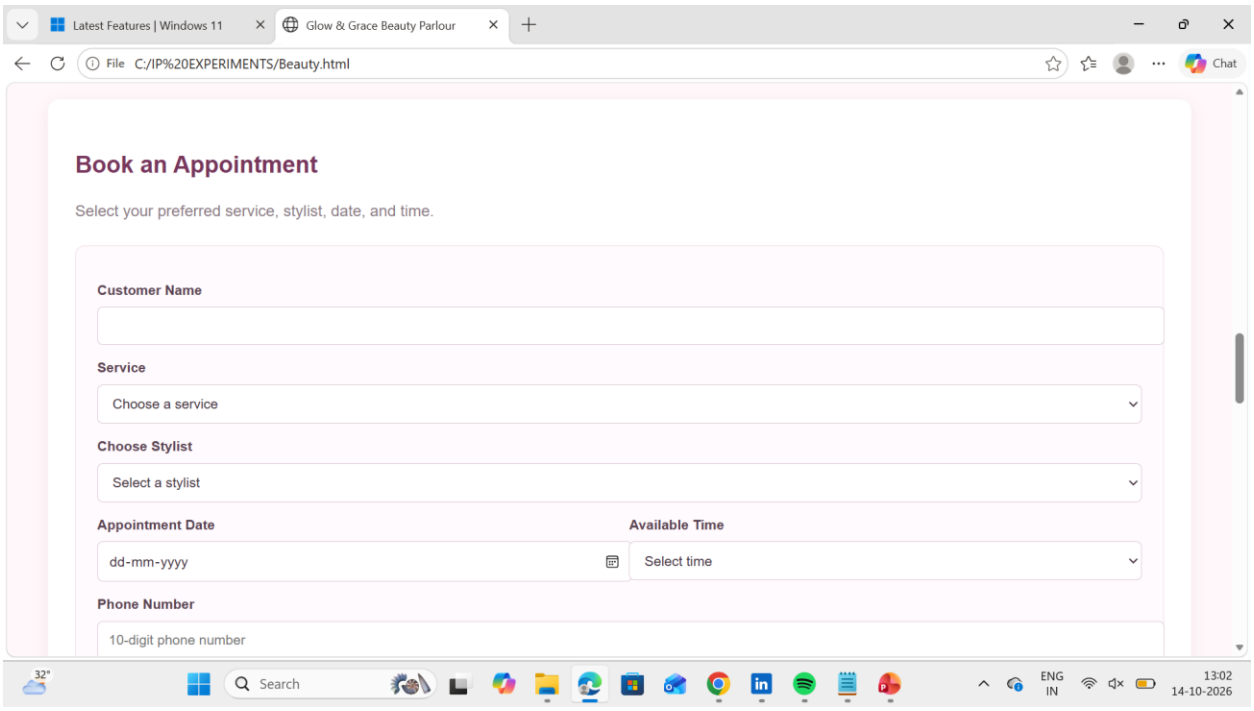

Result:

The beauty parlour appointment system was developed and tested successfully. Customers could book, reschedule, cancel and pay for appointments, and the salon manager could manage the calendar, reservations, and feedback.
